Open Innovation <i>A Low-Cost Embedded Acoustic and Vibration Sensing System for Monitoring Insect Activity in Stored Grain</i> <i>KernelSense monitors acoustic and vibration signals within stored grain. A MEMS microphone and piezoelectric sensor capture environmental signals, while an ESP32-S3 processes them locally and uses lightweight machine learning to classify background conditions, disturbances, and target-like patterns. Open innovation <i>Title: Intelligent Transformer Capacity for EV Charging,</i>	9345284689	Male	

The rapid growth of EVs is increasing demand for charging infrastructure and placing additional load on distribution transformers. Transformer load varies throughout the day, leaving capacity unused during low-demand periods while creating overloading risks during peak demand. There is a need to intelligently utilize available transformer capacity for EV charging while considering real-time load, charging demand, and transformer safety.	9600965431	Female	Hardware

Open Innovation Access to emergency medical help is delayed due to lack of a unified platform for locating nearby hospitals, ambulances (road & air), and SOS contacts, along with language barriers between patients and doctors. There is a need for a multilingual, offline-capable app that consolidates real-time medical location data, ambulance availability, and doctor consultation to reduce emergency response time.	7397098550	Male	Software
